"I've seen patients with a rupto	ıred eardrum or pu	lled back muscles, and you hear about cracked

and chairman of the Head and Neck Institute at Cleveland Clinic.

physiology or some other anatomical quirk could $(\bot)(\underline{})(\underline{})(\underline{})(\underline{})(\underline{})$ a held-in
sneeze.
While such reactions are unlikely, Benninger says sneezes aren't meant to be caged. "Sneezing
probably cleanses the nose of irritants, viruses and those types of things," he explains. He uses
the word "probably" because (オ)()()()() sneezing might perform other
functions, from signaling to people that you're sick to resetting the homeostatic environment in
your nose.
"I've read reports that people sneeze differently in different cultures—almost like a learned
behavior," he says. He adds that everything from your lung capacity to the structure of your face
and nose $(\mathcal{D})(\underline{\hspace{0.4cm}})(\underline{\hspace{0.4cm}})(\underline{\hspace{0.4cm}})(\underline{\hspace{0.4cm}})$ forcefully you sneeze, and the potential of your sneeze
to cause or exacerbate an injury.
His advice? Don't hold in a sneeze. "If $(*)(\underline{})(\underline{})(\underline{})(\underline{})$ and you want to stop
it, rubbing your nose can help," he says. For patients $(\mathcal{I})(\underline{})(\underline{})(\underline{})(\underline{})(\underline{})$ sneezing—
those who've recently undergone surgery or broken a bone—Benninger advises opening your
mouth wide to minimize a sneeze's strength. "It's like forcing water through a pipe," he says. "If
the air can escape through your nose and mouth, that creates less pressure than forcing it through
a smaller opening."
Just make sure that when you sneeze, you're doing it into the crook of your arm, not your hand.
"We know sneezing can project smaller particles 10 to 12 feet, so it's $(\mathcal{F})(\underline{})(\underline{})(\underline{})(\underline{})$
()," Benninger says. "But if you sneeze into your hand, everything you touch (¬)()
()()." Your clothes help absorb particles, and you probably won't be touching much
with the inside of your arm, he adds. Gesundheit! And safe sneezing, everyone.

The Internet of Things (IoT) is the idea that it is not just computers that can be (h) up to the Internet, but everyday objects as well. In so doing, they (a) new functionality. Add Wi-Fi and a motion sensor to a light bulb and you have a remote (a) system; add Wi-Fi to a stereo system, and you can control your music from your phone. In the (c) marketplace, the concept applies to web-connected devices such as thermostats, televisions and cars. But until a few years ago, laboratory equipment could not be (1) in the same way. The emergence of connected instruments and equipment promises to untether researchers from the laboratory letting them fine-tune experiments and analyse data remotely. It allows lab managers to monitor instrument use and catch potential equipment (f) before they happen. But (s economic concerns, and the (in) teething pains that are inherent in any evolving technology, are moderating enthusiasm.

(Adapted from Jeffrey M. Perkel, "The Internet of Things Comes to the Lab," *Nature*, Vol. 542, 2017)

インターネットオブシングス (IoT)というのは、コンピュータだけでなく、日用品もインターネットにつなぐことができるという考えである。そうすることで、それらのものは新しい機能性を獲得する。電球に Wi-Fi とモーションセンサーをつけると、遠隔警報装置になる。Wi-Fi をステレオシステムにつけると、自分の電話から音楽を操作できるようになる。消費者市場においては、IoT の概念は冷暖房器具、テレビ、車といった、ウェブに接続された装置について当てはまる。しかし、つい数年前までは、実験設備は同じようなやり方でつなげることはできなかった。ネットにつながった器具や設備の出現により、研究者は実験室から自由に動けるようになり、研究者は遠方から実験を微調整したり、データを分析したりできるようになる。実験の管理者は器具の使用を監視することや、ありそうな設備の不具合を事前に見つけることができるようになる。しかし安全性や経済性に関する懸念や、どのような発展途上の技術にも内在する、避けられない初期の困難は、IoTへの熱意を減速させている。

In the dialogue that follows, phrases have been removed and replaced by spaces numbered (17)—(31). From the boxed lists [A] and [B] below, choose the most appropriate phrases to fill in the spaces. In both lists, all choices must be used; and the choices should be made to produce the most natural conversation overall.

Jo: Long time no see! How are things with you these days?

Kate: Oh, fine. I'm in the same job, and I'm still really enjoying it. How about you?

Jo: Not so good, but things are looking up. I've finally made the decision, after (17) for some time now, to move companies.

Kate: I had heard something to that effect. Why? What's the matter?

Jo: Well, I don't think I'd be (18) if I told you I have been unhappy at my current work for quite a while now. I mean, I have tried to (19) a brave face, but I suppose some people must have guessed, right?

Kate: Sure, and actually I even heard a rumor that you had had a quarrel with your boss. Sorry to press you on it, but what exactly happened?

Jo: Well, one of the photocopiers was (22) a strange, burning smell, so I called in the engineers.

Kate: Sounds sensible to me.

Jo: I thought so too. But my boss said that I should have checked with her first, which I would have done, but she was in an important meeting at the time.

Kate: Well, that seems reasonable.

Jo: Right? That's what I told her, but she wouldn't have it! I always knew she was stubborn, but I thought, "No way! I'm not (23) on this one. I didn't do anything wrong!"

Kate: I don't blame you!

Jo: I hear your boss, Sarah, is the complete opposite.

Kate: Yes, she's great. She knows exactly how to (24) the best in her employees.

Jo: I don't suppose you have a position open at your company at the moment, do you?

Kate: Funny you should mention it, but we are looking for a new head of marketing. We want someone who will (25) a fundamental change in the way we promote our products.

Jo: That's interesting to know.

Kate: To be honest, it's a dream job. It pays well and it's staffed by a young team,

(26).

Jo: Sounds good. Do you think I would stand a chance if I were to apply?

Kate: I don't see why not, (27).

Jo: OK, I'll make sure I won't get my hopes up too high then, but it's good to hear that

at least I'd be in with a chance.

Kate: Yes, (28). After all, you've got quite a lot of experience in that field, haven't

you?

Jo: Yes, quite a bit. Is there anything in particular that I should mention in my

application?

Kate: Not really, except to say that we tend to favor candidates like yourself who have

worked abroad, (29).

Jo: That's very useful, thanks! Is there anything else I should know?

Kate: Not that I can think of, (30).

Jo: Much appreciated!

Kate: Don't mention it. Good luck with the application, (31).

Jo: I won't. Anyway, it's great to see you! I'll be in touch again soon.

The roots of the detective story go as far back as Shakespeare. But Edgar Allan Poe's tales of rational crime-solving created an important genre. His stories revolve around solving the puzzle of who committed the crime, (21-22) too.

The key figure in such a story is the detective. Poe's detective, Auguste Dupin, is a gentleman of leisure. He has no need to work. Instead, he keeps himself occupied by using "analysis" to help the real police solve crimes.

Even Arthur Conan Doyle, creator of Sherlock Holmes, had to acknowledge Poe's influence. Dupin, like Sherlock, smokes a pipe. He's also unnaturally smart and rational, a kind of superhero (23-24) great feats of crime-solving. And in both cases, the story's narrator, who is literally following the detective around, is his roommate.

Poe's formula appealed to the scientific spirit of the 19th century. That's because detective stories promised that (25-26) question. The detective story caught on because it promised that intelligence will triumph. The crime will be solved by the rational detective. Science will track down the (27-28) at night.

When the Customer Is Wrong: Airlines

- (1) It's one of the oldest adages of the retail world: "The customer is always right? Of course, very often the customer is wrong. Every day customers behave in (a)ways that make (b)the lives of waiters, cashiers, customer service reps and other (c)retail workers to be miserable. And in many cases, these customers don't even realize how annoying (d)they're being.
- (2) To rectify this, we've decided to talk to the people (a) on the other side of the desk, (b) to the hope of educating consumers (c) on what sort of behavior makes life difficult for the (d) people serving them.
- (3) When flights are (a)<u>delaying or overbooking</u>, the customer service representative manning the gate (b)<u>can quickly become</u> (c)<u>the most put-upon person</u> in the terminal. And that's especially true if there aren't enough passengers willing to be voluntarily bumped from the flight, (d)<u>which means that</u> someone with a ticket isn't getting on.
- (4) "Some people come up and bang on the counter and scream and yell," (a)recounting Goddard, who, says she always had (b)a lot of sympathy in these situations.
 "If I thought (c) I was going on vacation and I got bumped, I (d)would be disappointed, too."
- (5) Still, she (a)<u>urges travelers understand</u> that (b)<u>shouting your way onto</u> the plane means someone else gets bumped instead someone who (c)<u>could have</u> an (d)<u>even greater</u> need for getting to their destination on time.

4 下記の英文はリチャード・バック(Richard Bach)の『カモメのジョナサン』(Jonathan Livingston Seagull, 1970)の一節である。下記の欄から、適切な単語を選び、英文の空所(1) ~(10)を埋めなさい。ただし、同じ語を繰り返し用いないこと。

Most gulls don't bother to learn more than the simplest facts of flight — how to get from shore to food and back again. For most gulls, it is not flying that (1), but eating. For this gull, though, it was not eating that (2), but flight. More than anything else, Jonathan Livingston Seagull loved to (3).

This kind of thinking, he found, is not the way to (4) one's self popular with other birds. Even his parents were dismayed as Jonathan (5) whole days alone, making hundreds of low-level glides, experimenting.

"Why, Jon, *why*?" his mother asked. "Why is it so hard to be (6) the rest of the flock, Jon? Why can't you (7) low flying to the pelicans, the albatross? Why don't you (8)? Jon, you're bone and feathers!"

"I don't (9) being bone and feathers, Mum. I just want to know what I can do in the air and what I can't, that's all. I just want to know."

"See here, Jonathan," said his father, not unkindly. "Winter isn't far away. Boats will be few, and the surface fish will be swimming deep. If you must study, then study food, and how to get it. This flying business is all very well, but you can't eat a glide, you know. Don't you (10) that the reason you fly is to eat."

Jonathan nodded obediently. For the next few days he tried to behave like the other gulls. But he couldn't make it work.

[mind, like, fly, forget, eat, leave, matters, mattered, make, spent]
